Team Project Submission Portfolio

You must submit the final 12-week project of the module in a .zip file according to the following requirements.

The zip file will be named as StudentID_GroupID_TeamProj.zip, and will include 4 folders containing the following:

1. "**Product**" folder: contains the running application, database, dlls, etc.

- If it is a software application, you must submit the stand-alone running application - no code: All executables must be built for RELEASE and include all non-standard DLLs that should be installed in the client's machine (PC).
- If it is a web-based application, you must submit the link of the fully working web application.
- If it is a hardware-based device, you must demonstrate a working prototype.

2. "**Report**" folder: contains a Report of 2000-2500 words (Description of the product, installation instructions and mini user manual). The same for all team members.

3. "**Presentation**" folder: contains the project's product final slide-presentation. The same for all team members.

4. "**Documents**" folder: contains the following:

4a. Your final assessment of the performance of every other team member, using the provided 5CC518_PerformanceReviewVersion2a.xls, according to the assessment guidelines.

4b. A unified .doc file which contains the minutes of your team's weekly meetings. You must provide members' names and IDs.

4c. A unified .doc file which contains your personal week diaries. You must provide your name and ID.
